

LÄTT Clamp absorbent

Some rooms must function for discussions, movement, film showing as well as lectures, at the same time feeling calm and comfortable. For this type of room, LÄTT Clamp absorbent is excellent. LÄTT is an easily mounted, efficient absorbent worth its price. The absorbent is preferably placed between other ceiling and wall installations. Thus, existing installations like e.g. electricity and ventilation do not have to be changed.

Akustikmiljö's LÄTT Clamp absorbent consists of a mineral wool board completely dressed in polyester non-woven (also the edges). Absorbent measures 1200 x 600 x 50 and 1200 x 900 x 50 mm, other measures upon request.

The absorbent is easy to install with the enclosed two clamps painted in white.

Akustikmiljö was started in 1996 and today represents one of the leading companies within acoustics. Akustikmiljö's business concept is to design sound-improving solutions aimed for anything from modern settings designed by architects and music studios to K-labelled (under national protection) seventeenth century buildings. Akustikmiljö's head office and production plant are found in Falkenberg, Sweden, and we deliver solutions to a number of countries all over Scandinavia and parts of Europe.
